**Prescription Medications**

All prescription medications must be reported to the Health Services Office. The school nurse will determine which medications may be in the possession of the student or stored in dormitory rooms. No student may keep Schedule(C III) medication (Codeine, Percocet, Percodan, etc.) or (C II) controlled medication (Ritalin, Adderall, Concerta, etc.) without permission from the school nurse.

All controlled medications will be locked in the Health Office and dispensed on a weekly basis or as needed according to the prescription.

Any student in violation of this policy will be reported to the Dean of Students and may be subject to disciplinary action.

No medication will be given without seeing the student first. If a resident student is too sick to come to the Health Office the nurse will see the student in the dormitory. Medication will only be dispensed to the ill or injured student, not to a friend or roommate to be given to the student.

Faculty members and dorm parents may dispense medication, approved by the nurse, if they feel comfortable doing so. No faculty member will be required to dispense medication at any time.

Please list all current prescription medications including dose and frequency:
